

7 How to harvest honey

1

Wear protective gear

2

Light the smoker

3

Gently open the hive

4

Gently brush bees back into hive with a feather

5

Pick combs that are two-thirds sealed full of honey

6

Cut away combs and honey

7

Place capped honey into clean container

8

Push the unripe combs next to the combs

8 How to process honey

1

Use a hot rod/knife to de-cap the honey combs-by passing it over the combs

2

Place it on a clean piece of cloth

3

Turn the comb over and repeat the above process

4

Pack clean honey in a container with sealed lids.
